AQAR Report data for A.Y. 2022-23

2.3.2 - Teachers use ICT enabled tools for effective teaching-learning process. Write description in maximum of 200 words		
Sr. No.	Description of Attachment	Page No.
1	Online Sessions, Counselling and Quiz conducted by faculties	1 to 2
2	Power Point Presentation	3 to 5
3	Digitally equipped Classroom and Seminar Halls	6 to 8
4	Various Technical Activities	9 to 11

1) Online Sessions, Counselling and Quiz conducted by faculties

> Online Sessions

2) Power Point Presentation

**Dr. Babasaheb Ambedkar Technological
University, Lonere**

**Shri Tulja Bhavani College of
Engineering, Tuljapur**

Department Of Computer Engineering

**Class: B.TECH CE
Subject: Artificial Intelligence
Prof. R. H. Adekar**

BTCOE603(B) Artificial Intelligence

**[Unit 1]
Introduction**

Introduction,
What Is AI?,
The Foundations of Artificial Intelligence,
The History of Artificial Intelligence,
The State of the Art.

1.1 Introduction

- Why we consider artificial intelligence to be a subject most worthy of study, and in which we try to decide what exactly it is.
 - Our mental capacities are so important to our everyday lives and our sense of self.
 - The field of artificial intelligence, or AI, attempts to understand intelligent entities.
 - Thus, one reason to study it is to learn more about ourselves. But unlike philosophy and psychology, which are also concerned with intelligence, AI strives to build intelligent entities as well as understand them.
-
- Another reason to study AI is that these constructed intelligent entities are interesting and useful in their own right.
 - AI has produced many significant and impressive products even at this early stage in its development.
 - AI addresses one of the ultimate puzzles. How is it possible for a slow, tiny brain, whether biological or electronic, to perceive, understand, predict, and manipulate a world far larger and more complicated than itself?

- A student in physics might reasonably feel that all the good ideas have already been taken by Galileo, Newton, Einstein, and the rest, and that it takes many years of study before one can contribute new ideas.
- AI, on the other hand, still has openings for a full-time Einstein.
- The study of intelligence is also one of the oldest disciplines.
- For over 2000 years, philosophers have tried to understand how seeing, learning, remembering, and reasoning could, or should.
